# Notebooks from Defter Kurdu based on Countries and Cities concept in special stands

Defter Kurdu is in Galata District

Defter Kurdu is in Pizza Tower

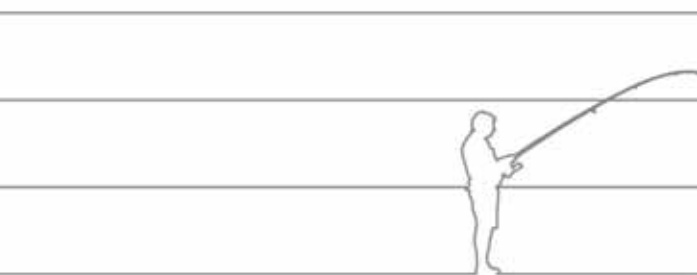

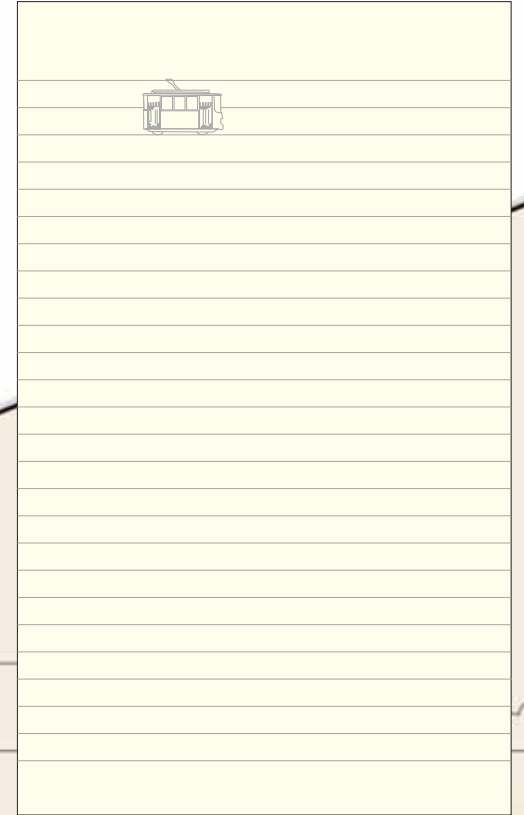

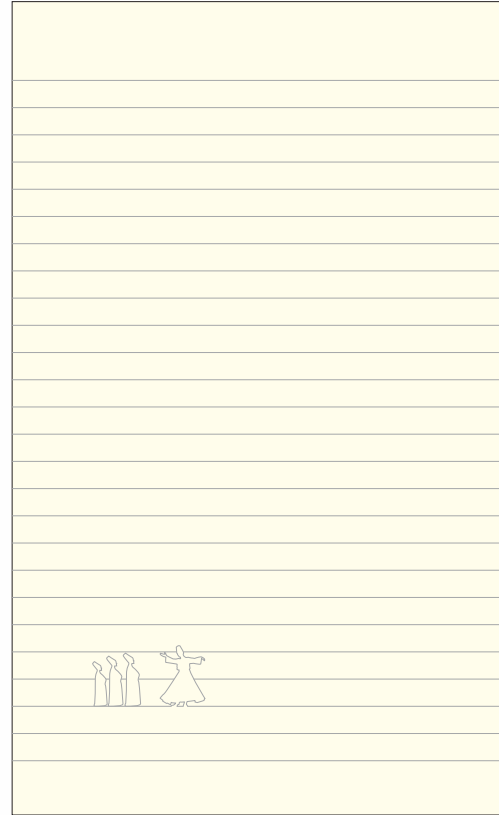

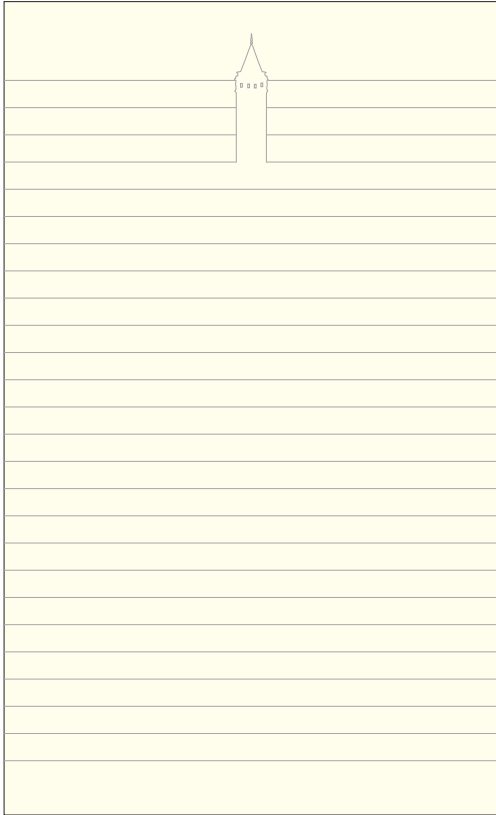

Defter Kurdu is presenting to the world's taste the extraordinary notebooks that it creates with an emphasis on simplicity and user friendliness. Defter Kurdu is reflecting world's cultural values, historical richness and geographical properties, with a different and surprising style, within its "Countries and Cities" concept. It displays its sophisticated notebooks, designed for its "Countries and Cities" concept, in special stands. For example it brings together Galata Tower with the consumer in "İSTANBULİSTANBUL" notebook. It will present its "ITALYITALY" notebook, which is still in design stage, in Pizza Tower stand...

Defter Kurdu is a first in the world among international retail chains with this unique strategy that it implements!
